Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12 October 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-3 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Czerwinski (3,899,787).

Czerwinski in figures 1-3 discloses an antenna for receiving or transmitting broadband high frequency signals (abstract and claim 1) comprising a dipole antenna element 10,12,14 encased within a dielectric housing 52, and a conductive sleeve 56,58,60 provided over the dielectric housing at the feed point (at 66,72, figures 2-3) of the dipole antenna element, wherein the dipole element comprises coaxial conductive tubes (abstract) and wherein the feed point is between the conductive tubes 10/14.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 6-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Czerwinski in view of Seward et al (5,668,564).

Art Unit: 2821

Czerwinski has been discussed above but fail to teach the antenna for mounting to a vehicle. However, Seward et al in figure 1 teach the antenna for mounting to a vehicle (column 1, lines 7-24). It would have been obvious to provide the antenna for mounting to a vehicle as taught by Seward et al for the purpose of enhancing the usefulness of the portable units in automobiles (see column 2, lines 36-52).

Allowable Subject Matter

4. Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Dienes, MacDougall, Leitner et al., and Zeilinger et al. are cited as of interest and illustrated a similar structure to a dipole antenna device.
